The Conference

The International Conference on **Computational Linguistics in Bulgaria** (CLIB) is organised by the Department of Computational Linguistics at the Institute for Bulgarian Language (IBL) and by the Institute of Information and Communication Technologies (IICT) of the Bulgarian Academy of Sciences.

Over 100 people attended each of the previous instalments (2014, 2016, 2018, 2020). The participation of Bulgarian and foreign scientists and Bulgarian technology companies has marked a steady increase with each following edition.

CLIB 2022 will be held 8 – 9 September 2022 in Sofia, Bulgaria.

Invited speakers at CLIB 2022 are:
- Prof. Shuly Wintner (Israel)
- Prof. Iryna Gurevych (Germany).

Our Mission

At the 51st Annual Meeting of the Association for Computational Linguistics (ACL 2013) in Sofia a meeting of Bulgarian computational linguists took place where many colleagues highlighted the need for active partnership between the scientific community in Bulgaria and scientists worldwide.

CLIB's mission is to respond to the need for exploring novel approaches and methods in computational linguistics and natural language processing (NLP) especially with a view to their application to small and less-resourced languages such as Bulgarian, and the bridging of the discrepancies between big and small languages with respect to language technologies.

The Conference is dedicated to fostering the NLP community and furthering the cooperation between Bulgarian and foreign researchers and teams around the world through sharing high-quality scientific results in all areas of computational linguistics and NLP.

CLIB 2022 provides an opportunity to technology companies to establish cooperation with the NLP community and promising young scientists working in the filed of computational linguistics and language technologies.
